Title:
Comments: I oppose expanding surface infrastructure at the Stillwater Mine on the Custer Gallatin National Forest, which would lock in platinum group metals mining for up to 42 more years.
I also have a problem with the parent company Sabanye - Stillwater and their human rights abuses at their other mines outside of the United States.
I believe that a commitment of this magnitude should include an EIS by the Forest Service as well as a public conversation about the large number of deaths and unethical treatment of miners by this corporation outside the United States.
