Comments: I am opposed to the increased logging and removing older trees from our forests. There was a years long public process that lead to the rules we had un place before the Trump administration took office. Now we have the wolf guarding the sheep. The logging industry is now in charge of public lands decisions, and that is wrong. Clearcutting increases fire risk- it heats the land, increases wind speeds, reduces rainfall, removes carbon storage, and of course, reduces public access and wildlife health. Stop turning our public lands into private wealth.
