Comments: I am writing to comment on Roby Forest Management (USFS-293810), and I have serious concerns.

I am particularly worried about the loss of mature forests, carbon storage, and wildlife habitat.

Even though I live in Michigan I understand the impacts on the public lands this decision affects. If this goes through, irreversible damage to the Hell Canyon Ranger District will affect erosion, runoff and must be addressed.

I urge U.S. Forest Service to fully analyze these impacts, consider alternatives that protect public lands, and take public input seriously. Thank you for considering my comment.
