Title:

Comments: I am against this project being approved by the USFS. This project removes too many overstory trees and leaves debris and ground cover plants room to grow. This area has been logged in the past and the timeframe to manage this area again is too short for recovery from past operations. Leaving the underbrush and bare ground will allow invasive plants to enter the area. The understory will become hotter and dryer, which will increase the danger of wildfires. The slash piles left will not be removed or mitigated which creates more fire danger. I oppose this project.

Sincerely

Jeff Anderson
