Comments: I am writing to comment on Stillwater Mine Complex Amendment 14 Environmental Impact Statement (USFS-296522), and I have serious concerns.

I am particularly worried about the risks to clean water, fish and wildlife habitat, and nearby communities from mining.

All of them is a place that matters to me. I hike there. If this goes through, biodiversity, animals, our land.

I urge U.S. Forest Service to fully analyze these impacts, consider alternatives that protect public lands, and take public input seriously. Thank you for considering my comment.
