Comments: I am writing to comment on Roby Forest Management (USFS-293810), and I have serious concerns.

I am particularly worried about the loss of mature forests, carbon storage, and wildlife habitat.

All of them is a place that matters to me. I travel there. If this goes through, once gone, these precious places cannot be replaced. Stop looking at these lands and resources as only items on a balance sheet.

I urge U.S. Forest Service to fully analyze these impacts, consider alternatives that protect public lands, and take public input seriously. Thank you for considering my comment.
