Comments: Please do not allow for expansion of Targhee Ski Resort. This is sensitive wildlife habitat that has unique flora and fauna. Humans are slowly encroaching the Greater Yellowstone Ecosystem, which is an island in terms of ecological health and biodiversity. We should be looking for ways to removing stressors to this ecosystem, not straining our local ecology with habitat loss and interrupting migration corridors. We don't always need bigger resorts to have more fun - small is enough! Our community is already struggling with housing and this will only amplify the cost of living for residents who have called this home for years. Please do not allow for expansion. It hurts everyone except those with lots of money.
