Comments: Dear Supervisor Pierson,

My name is Rayma Cates and I am writing to object to the Final Environmental Impact Statement and draft Record of Decision. I commented on this project previously and have been identified as commenter #451.

I object to this FEIS. It seems, the FEIS is designed to make rich developers richer and to cater to vacationers with money. The FEIS pushes aside the very real impact further development will have on Teton Valley, local affordability and the locals who are trying to live here. It also pushes aside the impact development will have on the wildlife trying to survive in the developed area.

The Forest Service is supposed to manage public land for the good of the public. I feel the FEIS suggests the Forest Service is managing public land for the pleasure of the rich. The Forest Service needs to get back to managing for the good of the general public.

Thank you.
