Comments: I was on the Park City School board and we worked tirelessly with the county commissioners to try to get this amendment back open. We had valid concerns and valid reasons why Park City should have been part of the original plan. Our county commissioners chose not to open this back up because they were too afraid of the backlash they would receive from Columbus and Absarokee. If they included us, it would be money taken from their schools, which is not a valid reason. There has definitely been impact to the community of Park City. People have moved in and with the busing system there has definitely been an impact to our road and transportation. Also, with the layout, there has been an impact to our community as well. My husband worked at the mine and was laid off when the last round of layoffs occurred. I think Park city should be considered just as much as the other communities. We have had the same impact on our community and our school should be part of the schools that get mine money. Thank you for your concern and please consider adding Park City to the plan.
