Comments: If Stillwater Mine is granted this 42 year expansion, funding for the town of Park City needs to be considered to cover the impact of an expanded workforce and impact on those workers living in the Park City area. Park City School does not currently receive funding from Stillwater Mine to assist with education costs, busing transportation costs or maintenance/upkeep of the school building. If the workforce grows, it could create a need for new teachers and school expansion or replacement. We also need to evaluate the impact of increasing housing needs and impact on the water/sewage system which would need to be expanded with increased demand. Many policies need to be reviewed and revised to reflect the impact on Park City such as the obsolete 1998 baseline plan and home valuations, demands for equitable property tax base sharing with Park City to stabilize school bonding capacity and relieve local tax payers, evaluate & compensate property owners for required parking areas for workers who use forced busing requirements, review and address the public records regarding prior attempts by PCSD #5 to secure mitigation. Park City should receive the same considerations that Columbus and other surrounding communities receive. We should not be excluded.
