Comments: With the up coming amendment our school Park City School District #5 should received a percentage of the money generated by the mine. The impact it could have is a positive impact on students, teachers, and the community. The extra funding could be used to improve classrooms by purchasing updated textbooks, computers, and other technology. It could also help repair or renovate older parts of the school, making the building safer and more comfortable. Park City School could also hire additional teachers, counselors, or support staff.

Park City School is being held to a punitive evidentiary standard that is not being applied to the other districts, this is an unfair exclusionary and cannot be used going forward. The socioeconomic analysis needs to be updated and formally designated Park City School District #5 as an affected local government unit eligible for tax sharing allocation.
