Comments: I am writing to comment on Dead Mountain (USFS-301815), and I have serious concerns.

I am particularly worried about the loss of mature forests, carbon storage, and wildlife habitat.

The forest up the river from where I live is a place that matters to me. I go hiking and wildlife watching there. If this goes through, not only would wildlife habitat be lost, but the hills that are logged in this steep section are prone to landslides after logging. This could hurt the people who live remotely here.

I urge U.S. Forest Service to fully analyze these impacts, consider alternatives that protect public lands, and take public input seriously. Thank you for considering my comment.
