Comments: my understanding that although the ski area has the funds to proceed with a major expansion they are cutting back on public transportation in the valley.

the current system is excellent and should be maintained or expanded.

driving to the mountain for valley residents is undesirable for all involved, parking is poor and the busy drop off area can be hazardous.

we have used this system for many years and love it. the ability to leave your car unused while enjoying the valley was and is a major selling point for wv home ownership.

i hope this is an appropriate forum to offer these comments and please take them into consideration
thanks
