Comments: I'm writing to oppose the Dead Mountain logging proposal in the Willamette National Forest. I live in Eugene, Oregon and recreate often there, this is in my backyard.

I'm concerned that this proposal does not provide a year-by-year cumulative harvest volume analysis across all local projects that shows that the combined harvest will remain within sustainable bounds.

I urge greater accountability and transparency about this and other logging projects in my local National Forest, and request that a complete long-term ecological analysis be presented before any projects are approved.

Thank you
