Comments: I am a resident of Silverthorne and a regular driver of Loveland Pass. In the last decade we've seen Loveland Pass traffic increase to the point that the road is entirely blocked for multiple days a week for several hours in the morning. This is caused by traffic to Arapahoe Basin. The resort has acknowledged the problem they're causing and have worked to reduce the problem by implementing parking restrictions. These restrictions (required reservations, eliminating free parking) have successfully reduced traffic on Loveland Pass. Adding additional parking, as proposed in the Development Plan, is a step in the wrong direction. After years of work to reduce Loveland Pass traffic, adding additional parking will only increase traffic. I strongly oppose Arapahoe Basin adding additional parking.
