Comments: The land at Sweetwater was set aside with the expectations and relief on the part of the local residents. As well, passive users of the land, like hikers, birders and people who want to just enjoy largely unspoiled areas and thriving habitat.

It's also extremely disappointing that the CPW would misrepresent the local resident's feelings about the proposed project, in order to fast track it through!

CPW does make money on these developed areas, so it's understandable that exploitation of the area would be in the best interest of the CPW.

Please consider though, the best interests of the people in the area, the habitat that would be destroyed and the site specific and other wildlife threatened and displaced. That should be the first objective!
