Comments: Regarding the Sweetwater Lake Recreation Management and Development Project, I would like to express my support for Alternative 3, emphasizing a more primitive recreation experience, not under the management of CPW. There are already many highly developed State recreation areas nearby, such as Sylvan Lake, Ridgeway, Rifle Gap and Stagecoach Lake, that offer more developed campgrounds, lodges, rentals etc. and are almost always crowded. Sweetwater Lake is much smaller, and has always been a place of simplicity and peace. A primitive campground with a limited number of sites, and perhaps a small concessionaire offering paddle board and canoe/kayak rentals, would allow for a special, relaxing experience without attracting large groups and crowds, causing noise, excessive traffic and overall degradation of the natural area and the ability to experience it in relative solitude. There are plenty of developed recreation areas. Please let the Sweetwater Lake remain a place to escape development and enjoy the simple joy of experiencing nature.
