Comments: I visited Sweetwater Lake several times for educational and recreational experiences from 2018-2020, both for work and personal time, when I was a resident of Eagle County (I now live elsewhere in Colorado). I cannot imagine this area being developed further, especially with campgrounds, stores, employee housing, a lodge, etc. There are valid concerns already put forth that should be heeded surrounding emergency access, wildlife conservation, natural character, and impact on local communities. I strongly oppose additional development of Sweetwater Lake and strongly oppose it being managed by Colorado Parks and Wildlife. Eagle County and Garfield County need outdoor recreation and conservation areas that are not continually developed. We don't need to continue building and expanding the public spaces that are already loved by our communities the way they are.
