Comments: I would hope that in your inclusion of the public that members of the public will be able to participate in the actual evaluation process. I feel that it is important for many reason, education not being the least of the reasons, that folks can be involved in the decision making process of their forest lands. It may also help to encourage folks to be more responsible. Being onsite in these damaged areas can have a valuable impact on influencing the care folks will take while communing in the forest.
