Comments: I support the Forest Service's Proposed Alternative because it provides a thoughtful balance between conservation and recreation. Sweetwater Lake is a remarkable public resource that deserves careful stewardship. The proposed 20-year partnership with Colorado Parks and Wildlife offers the long-term management needed to protect water quality, wildlife habitat, scenic character, and visitor safety while accommodating increasing public interest. I encourage the Forest Service to move forward with the Proposed Alternative and continue to prioritize low-impact design, habitat protection, and maintaining the quiet, natural character that makes Sweetwater Lake so special.
