Title:

Comments: As a citizen of the United States, I cannot believe this is happening again. Mortized use of the forest in the winter does not impact the forest negatively. I am 55 years old have ridden sleds my whole life. I work in the forest products industry and we care in business to grow and use trees. Please do not restrict any more land use. Option 3 is somewhat acceptable. The fact this is a thing still blows my mind. Especially when the lack of management as a whole is costing OUR forests everything! It seems there is little care about that. Please consider the facts.

Thank you

Michelle Labadie
