Comments: Good morning,

I'm hoping my comment gets registered as, the Forest Service provided only a 5-day public comment period. This project uses emergency provisions that bypass the standard administrative objection process. I am opposed to the Heavy environmental footprint: I am also opposed to the plan involves building 9 miles of temporary roads and maintaining 21 miles of forest roads. Habitat disturbance: Logging in areas utilized by wildlife such as elk need their homes more than we do.
