

Data Submitted (UTC 11): 8/3/2026 4:00:00 AM

First name: Eric

Last name: Johnson

Organization: Amphibian Refuge

Title: Executive Director

Comments: Amphibian populations are declining worldwide, and amphibians are experiencing high extinction rates due to habitat loss, chytrid fungus, pollutants, pesticides, invasive species, and climate change. Amphibians are the most threatened class of vertebrates.

Please conduct biological surveys for amphibians such as the northern leopard frog and boreal toad. Minimize disturbance of potential amphibian habitats including Summit Creek, Center Creek - Parowan Creek, and Dry Lakes Creek. If needed, re-locate amphibians to a protected area.

Thank you for this opportunity to comment.
