Comments: As a citizen of the United States, I am appalled that a large mine will be built just 14 miles from Devils tower. Our national parks are a unique treasure that should be enjoyed by generations to come and I feel a mine that produces radioactive dust from a monument that gets millions of visitors is a huge risk to the park. I have visited Devils tower many times. It's a sacred place that was protected by Theodore Roosevelt, one of this nations biggest fans of our beautiful country and the current administration will not honor the preservation of one of the most beautiful places in this country. Seems our national parks are up for bid for any big corporation without zero consideration to the people of the United States. This must be stopped !!!
