Comments: The Okanogan-Wenatchee National Forest matters to me. I love the land. So does the wildlife that calls it home. Asking for those without a voice to restrict access across close to 4,900 acres and along 3.2 miles of Bonneville Power Administration roads, giving wildlife the undisturbed corridor the crossings were designed to provide. Give them the same chance at life that we, as humans, ask for. Our human footprint on this land is not necessary. Help us protect life, as God intended humans to do. We need to step lighter, for all life's sake!
