Comments: I oppose this proposed land sale in the N1/2SE1/4 of Section 29 on the Lolo National Forest because the disposal of National Forest land should require a compelling public benefit, not just administrative convenience and also once it has been sold, it is very difficult to return to public ownership.

Since this land is located adjacent to the bitterroot trail which is used by a multitude of people, it would make a good park adjacent to the trail. This land is also adjacent to residential housing and there is limited park space for these neighborhoods, so it would also make a good openspace serving the people living in this area.
