Comments: I will keep my comments short. My main concern is access has most roads in them out here. National force do not need to be closed. Access to grazing needs to be increased for fire suppression there's a proven fact that grazing works also more prescribed Burns help too, and as far as grazing is concerned why Life does not eat the same food as cattle or more browsers grazors , there should be full access to cutting firewood as a way to help clean up fire fuels for fire in short what was set in has worked very well till recent years when logging got cut back due to a environment. Group for service given into them groups is wrong. Mother nature no longer manage wildfires without our help as his fact of life created by humans over the years, therefore quit giving in to environmentalist and those who don't know any better. I continue as it is but increased grazing as it is hurting nothing you can fence off riparian areas and what other protections you need for sensitive plants
