Comments: Thank you for the opportunity to comment on this project. I have visited the lake for many years and consider it a treasure to pass on for generations. The lake has always been known for its tranquil and beautiful part of Colorado. It has been fun meeting families from all over the country. It would be irresponsible to see this treasure over developed. Once it is ruined it will never be the same and can't be reversed. My personal preference is to remove and rebuild the unsafe cabins and the lodge. They have been badly neglected and are just plain old. The original layout has worked for many years. It is great experience for families to stay in a cabin, go up to the corrals and go for a ride, fish and have a great dinner in the lodge. We have used the primitive camp sites also for the past 30 years. One of the greatest blessings of the lake is the quite night skies with unbelievable star shows. Please don't ruin this rare treasure. Many concerns are noise, narrow and dangerous roads, the eagles, falcons, moose, lighting and like we see this year, water supply. Sweetwater has had flooding and forest fires that have been common occurrences. With a over load of visitors there will be evacuations issues. Keeping the layout as is will keep a quality family experience. I am against quantity of campers but in favor of a Colorado experience. Many many families treasure this going back many generations. Again please restore and preserve this gem. Thank you for your consideration.
