First name: marla

Last name: cooley

Organization: It&#39;s All About the Water

Title: Vice Chair

Comments:

Well, here you go, another opportunity for me and others to tell you NO! No mining and ripping up the precious earth which we all share occupancy. Really!?

Fast track is on steamroll ahead in all states and all federal lands.

Even though

We, the people do not want our land, air, and water desecrated, poisoned, and left in a contaminated open pit.

Personally, I am assaulted by the onslaught of national and state aggressiveness to come into the open lands that are supposed to be protected, by YOU, we enjoy natures state with no disturbance of deveopment & industrialness. Protect it!! Who will, if not you who?

Can you sleep at night withyourself as a park representative while national park land being is raped...for profits?

Once done, left contaminated. Open and seeping that wicked, toxic crap out for eons. EAONS. Your childrens children won't even look like you, they will be so deformed, if they even get here.

Decline the permit. Do Not ALLOW open pit mining OR any mining

Sincerely,

~marla cooley
