Title:
Comments: Please do not move forward with this project. Besides the fact that this site is of deep cultural and religious significance to indigenous peoples, the environmental impact is also unconscionable. This land belongs to indigenous people as per the Fort Laramie Treaty of 1868. Do not continue to disrespect the indigenous people but also all future children of the U.S. by contributing to the rapid destruction of the natural world and climate change accelerated by projects such as this one. It is entirely unacceptable to allow this to continue.
