Comments: The blue mountains forest plan has to have a travel management plan approved as part of this proposal. I live in baker and recreate in these 3 forests weekly. The current travel management approach is weak and unenforced. The ODFW green dot system is not regulated and the goals of the program can not be met without enforcement. I utilize the forests for recreation, firewood collection, hunting, fish and just relaxing. A travel management plan has to be incorporated in the forest plan to maintain the beauty of the forest and allow for all users to maintain access to the areas
