Title:

Comments: Property owner in White Pine Creek immediately adjacent to the project area just east of Larch Creek. Attended the field trip meeting in October of 2024 where the initial project area was discussed in the field and discussions around possible treatment areas and prescriptions. Wished to discuss in more detail the PA and get clarification of the different treatment types and proposals (harvest systems, treatment Rx's, hazardous fuels treatments, roads, etc.). expressed comments:

- * Concerns regarding changes in water yield that might occur, given they experienced flooding along white pine creek last winter.
- * Visuals adjacent to property
- * Supports the fuels break treatments adjacent to the transportation system.
- * Supports regeneration harvest treatments and reforestation plans.
- * Interested in cross-boundary treatmens
