Comments: Reviewing the 4 alternative plans, #3 seems to be the best in terms of providing some improvements while keeping the area more pristine. The Sweetwater Lake area does not and should not lend itself to a large visitor group. Its remote nature and lack of development is a large part of the appeal of the site and should be kept as such. Plans that "maximize" visitors and usage would destroy the area. There are plenty of alternative recreation areas that are more appropriate for large volumes of people and the types of recreation being proposed.
