Comments: I am writing to you as a forestry professional who has worked with the Diné (Navajo) community in New Mexico - a Tribal National that has been severely impacted by the long term affects of local uranium mining combined with the Trinity Project.

Many Diné have died from the unresolved presence of uranium mining tailings and many continue to suffer, sicken and die from the contamination.

This new violation of sovereign Tribal rights in combination with the confiscation of yet more publicly valued and treasured public lands for destructive Extraction Industry use are grounds for my personal and professional total opposition to this proposed Roca Donda uranium mining project within the Mount Taylor Ranger District of Cibola National Forest & National Grasslands

I oppose this action as proposed, and I ask the agency to weigh the specific harms below.

I ask the agency to respond to each of the following issues in the record:
1. Please account for the risks to clean water, fish and wildlife habitat, and nearby communities from mining, especially the impact t Tribal sovereign rights.
2. Please account for the need for a full and honest environmental review before any decision is considered.
