Comments: I use the snowmobile trails to access dry lakes 3-7 times a week depending on snow dry lakes offers some of the best riding and scenery in Brian head. I also work for thunder mountain motor sports and rely on these trails for my income in the winter. I remember the first meeting with the developers of aspen meadows when they introduced them selves to the town and their plans they promised our trails would not be affected, now it seams it doesn't meet align with there interests. I think this is very disrespectful to the town and to the people who use these trails. I'm all for expansion and more terrain but that shouldn't come at the cost of shutting off access to thousands of acres of riding for other people. I see the joy that high mtn and all the other beautiful view points in dry lakes bring to my guests every day being a guide and I would like to continue to share it.
