Comments: I strongly support Alternative 2 of the Ski Santa Fe Snowmaking Modernization Project. Ski Santa Fe is an important recreational and economic asset for northern New Mexico, supporting local jobs, tourism, and our quality of life.

Alternative 2 is a practical, responsible investment that improves snowmaking reliability, skier safety, and terrain access while remaining within existing water rights and authorized annual water use. It also modernizes existing infrastructure while minimizing environmental impacts.

As someone involved in development and economic development in New Mexico, I believe this is the type of balanced, long-term investment our state should support. I urge the Forest Service to approve Alternative 2.
