Comments: I encourage the Forest Service to approve Alternative 2 for the Ski Santa Fe Snowmaking Modernization Project. Alternative 2 is a balanced approach that improves snowmaking reliability, skier safety, and the long-term viability of Ski Santa Fe while protecting natural and cultural resources.

The Environmental Assessment indicates that the project would stay within existing water rights and authorized annual water-use limits, avoid long-term water-quality impacts, and include mitigation to protect streams, wetlands, soils, and disturbed areas.

These improvements would support reliable winter recreation, local jobs, and tourism in northern New Mexico while minimizing environmental impacts. I respectfully encourage approval of Alternative 2.
