First name: Thomas and Constance

Last name: Dorst

Organization:

Title:

Comments: My wife and I attended your recent meeting on 9/14 at the Sisters Rangers Station and were impressed with all the hard work and analyses that went into your proposed restoration project.

We agree that protecting civilian and firefighter life, homes and businesses must always come first, along with your plans for long-term protection of the wild life in the area and their food sources. It is time we go on the offensive and remove risks that would result in another major wildfire.

We agree with all your objectives and approach and support your entire plan as presented.

Thank you for all that you do.
