Comments: There was a conservation promise made to protect this Sweetwater Lake. A special and serene place that will no doubt be ruined by the proposal set forth to make it a state park. We have seen what happens with the level of density converging on a small area and it does not resemble conservation.

Please do not ruin this special place. So few exist. Think of the wildlife and wetland! We have already encroached on these beings more than we deserve to. Think of the historic value that speaks to an authentic Colorado. The peaceful trail rides remind us the "old west" that so few get to experience in this unique quite peaceful way.

Please, Please, Please protect this gem and do not make it a state park!
