Comments: Hello,

I am writing to encourage the Forest Service to continue to protect our forests, not log them. The new proposals would open up an unprecedented amount of old growth areas. These areas provide habitat for endangered species, recreation for the public and necessary carbon capture so that we don't continue to have a warming climate. As an Oregon resident I encourage the forest service to continue to protect our forests including the Blue Mountains.

Thank you for your time,

Wolf Carr-Levin
