Comments: Information regarding the proposal needs to be more thoroughly presented to area residents.

Comment period needs to be extended beyond October 8

***My community, La Lama, which is directly adjacent to a recent forest service thinning needs to be separated from the overall proposal of treating vast Ponderosa forests. It needs specific, individual analysis emphasizing alternative fuel reduction methods other than burning. It may cost more to clean up but it is imperative not to set fire to the thinning piles!!

Do not place larger than 6" pieces of wood especially juniper and pinon in burn piles.

Clean up needs to be done in a timely way.

Eliminate the separation of the NM Forestry Division and subcontractors doing the cutting without direct responsibility linked to cleanup funding by the US Forest Service.

Thank you

Linda Friedman
