Comments: To whom it may concern,

I am writing to express my strong opposition to proposed the Land Management Plan revision for the Malheur, Umatilla, and Wallowa-Whitman National Forests. The plan revision must prioritize climate and wildlife conservation rather than expanding commercial resource extraction.

Specifically, I urge the Forest Service to maintain and strengthen the following protections:

- Standards to prohibit logging of large trees of over 20" in diameter at breast height.
- Standards that protect wildlife connectivity and blocks of mature and old forests.
- Existing Riparian Management Objectives for stream habitats and water quality.
- Road density limits.
- Wild and Scenic River miles.

The Forest Service should revise the plan to prioritize ecological health, climate adaptation, and the protection of legacy forests.

Thank you for considering these comments.

Sincerely,

Brenna McDonald
