Title:

Comments: Hello,

I am writing to object to the proposed Bear Lodge Rare Earth Project. The Forest Service's motto is "Caring For the Land and Serving People", and as such, I think it must prevent this project from going through. Public lands need to be protected now, more than ever. The environmental devastation caused by mining projects like this one are irreparable, permanently altering the flora & fauna of an area. Growing up here, the Black Hills National Forest has always been one of the most beautiful and important places in my life. Please live up to your motto and help protect it now.

Thank you,

Allanah Rolph
