Comments: While locals living near the Sweetwater project are concerned about impacts to the lake and surrounding area, this is not their private lake. It is land public land that should be able to be enjoyed by anyone. I do hold a concern about making sure the Sweetwater project does not allow for more visitors than the wildlife and land can handle. Destruction of wildlife habitat and degradation of the land , to the detriment of wildlife is something that must be considered when developing this area further for recreation. Once the changes are made, we all know there is no going back.
