Title:

Comments: I just want to point out the obvious. Look around. Do you not see what we've done to this planet that's been kind enough to provide life to all of us. Do we really want to continue this trend? How much time do we have left to repair the damage we've already done? Is the legacy of humanity going to be a timeless tomb of plastic, the only indicator we were ever here? Don't you think we can do better, and be the stewards of this planet we claimed when we claimed dominion and ownership of it?
