Comments: Hello,

My name is Jim heitz, I have seen that the forest service for the blue mountains is looking to change blue mountain forest management. That said.....dont.....ive started falling in the past five years, log prices are low, producing more timber will further hurt the log market, the impact of the roadless areas is going to further exacerbate deer and elk populations as well. I like to keep things short and sweet but, the management of the forest has been....ok if not improving before the change in forest service hierarchie. Please dont change what youre doing. More cattle, and more logs are only going to rape the forest.....not help it.....and I would like for my son to have a fighting chance to enjoy the mountains when he is in his 30's as i am.

Regards,

Jim
