Comments: This project while promising growth to Brian Head seems to also bring issues to the town, the expansion will impact the scenery negatively and the wildlife too, I do prefer the quietness of Brian Head and the dark skies above. The impact it has towards the trails of snowmobiles will impact my friends and I who enjoy snowmobiling out the back area between Dixie and Brian Head. Another impact on water supply does not fill me with happiness, as it will affect the full time residents of Brian Head and the people of Parowan. On the topic of wildlife, how does this affect hunting as well? How about hiking trails? Let's try to look at alternatives that don't do invasive expansion but inside look at a balance of economic growth, beautiful nature and good old outdoors fun.
