Title:

Comments: To whom it may concern, This is Dave Knight, resident of Walla Walla Washington. I have great concern for our Blue Mountains and precious forests of the west. After seeing the recent forest management policies in action, I must register a firm NO to the current proposal lifting protections and restrictions allowing 5 million acres to be commercially open for logging. There is a growing opposition to these policy changes. Many of us missed the deadline to comment on the Tiger-Mill sale. This was apparently by design in that notice was posted in the Pendelton paper allowing it to be missed by many. I want to be registered as meeting the deadline for this DEIS which as I understand it, gives me standing in the event of any future litigation. There will be strong opposition to this proposal. It's only a matter of full disclosure and due process. My statement should clearly meet the September 30 deadline. May it reflect the sentiment of a growing number of informed citizens who are ready to fight for our forests. Respectfully, Dave Knight
