Comments: Dear BH Town Leadership,
We have visited Brian Head for over 20 years and have owned and payed property taxes to Brian Head since 2014. As a property owner in Brian Head, what makes us love the area are the people that truly care about each other and how our town evolves over time. It is difficult to balance this evolution and manage the growth in a way that Brian Head doesn't loose it's charming character and ability to have balanced recreation. If government over regulates one specific recreation and makes that decision for the people, it's simply not good for those who like various forms of land use. The expansion of skiable terrain is super exciting, yet it shouldn't be done at the expense of the people that love and enjoy the snow mobile trails in Brian Head. Having stated, it would seem the only current plan that might work is #4. I would humbly like to see Aspen Meadows invest in additional public snow mobile/ATV trails along with the lifts and additional skiable terrain. I might have missed that part in the plans, if I did, my bad. If I didn't, could the town leadership request additional expansion of our snow mobile/ATV trails so they would be adding and not taking away from ones ability to recreate in the fashion they find most enjoyable.
Thank you for your time and reviewing my comment.
