Title:

Comments: I am writing because I am concerned about motorized access, roads, and wildlife habitat in the Blue Mountains Forest Plan Revision. My family hunts in the area below Greenhorn, and we rely on existing roads and ATV access to reach different hunting spots. Using our ATVs lets us travel more efficiently and affordably, and it makes our hunting trips more enjoyable. The final plan must protect and maintain existing motorized access. Where access has already been reduced, it must be restored. Wildlife and habitat direction must not be used as a reason to restrict motorized routes that families and communities use. The Forest Service must clearly disclose and analyze how any changes to wildlife and habitat management would affect road access, routes, and the people who depend on them. Protecting motorized access is important for families like mine, and I expect these concerns to be addressed before the Forest Service relies on the Draft Environmental Impact Statement or finalizes the plan.
